## June 30, 2019 Residential Mortgage Disclosure

In accordance with the *Office of the Superintendent of Financial Institutions Canada (OSFI) Guideline B20 – Residential Mortgage Underwriting Practices and Procedures* issued June 2012, additional disclosure is provided regarding the company's residential mortgage exposure.

The company is limited to providing residential real estate loans of no more than 80% of the collateral value. Lending at a higher loan-to-value (LTV) is permitted but requires default insurance. This insurance is contractual coverage of the eligible facilities that protects the company's real estate secured lending portfolio against potential losses caused by borrower default. It is provided by either government backed entities or other approved private mortgage insurers.

On an annual basis the company performs a stress test to determine the impact of a significant decline in house prices on the residential mortgage portfolio. Due to the high percentage of insured residential mortgages held on the balance sheet and the increase in house prices since initial underwriting, there is very little impact to the company's capital position from this stress event.

### Residential mortgages and home equity lines of credit (insured vs. uninsured)

The following table presents amounts of insured and uninsured residential mortgages and home equity lines of credit (HELOCs), by geographic regions.
